

KRASNOYARSK CITY ADMINISTRATION

KRASNOYARSK

INVESTMENT PASSPORT 2014

Ladies and Gentlemen!

Krasnoyarsk - is one of the largest municipalities in the Siberian Federal District, the capital of the second by area subject of Russian Federation - Krasnoyarsk region, core of Krasnoyarsk agglomeration.

During the last years Krasnoyarsk, concentrating the human, financial and natural resources of the region in itself, holds a high position among the cities of the Siberian Federal District.

The rapid development of Krasnoyarsk is officially confirmed by the announcement of the status of millionaire-city in 2012.

Potential of the city is basis of the economics of the region and serves as a guarantee of employment of 34% of the population of the Krasnoyarsk region.

Krasnoyarsk - is investment attractive city. The total investment in fixed assets of enterprises and organizations of the city was 76 billion rubles in 2012. Krasnoyarsk holds the status of the city with advanced non-ferrous metallurgy and processed products. Industrial economy is focused on the development of engineering, construction, defense industries, high-tech aerospace technology. But I want to emphasize that we are ready to change the economic structure and to implement technological innovations.

Krasnoyarsk is a connecting link between Europe and Southeast Asia, situating at the crossroads of major communications: rail, road, air, water. High proportion of enterprises in the spheres of construction, transport and communication, financial activities and trade also gives confidence for the future development of the city as a logistics and industrial center of Siberia.

The strategic location of Krasnoyarsk city predetermined not only the structure of the economy, but also the development of a unique

scientific potential. High-tech industries, research institutes and universities of federal and world level are concentrated in the city.

One of the major directions of investment attraction, of course, are cultural, entertainment and branding events that are held in the city. Therefore, the economics of event is a significant segment of economics of Krasnoyarsk. So, participating in the campaign for the Universiade-2019, we encourage the development of Krasnoyarsk as an international sports center with upscale sports facilities, modern infrastructure of tourist business.

A new stage of development of the city will be the transformation of urban planning policy. An active work is doing today to develop a new general plan the city. Its key principle is the polycentric development of the territory. We are confident that the new urban policies serve as an impetus to industrial development of high value added and high technology production. At this regard, we are ready to support conscientious investors whose innovative projects aimed at improving of the quality of life of Krasnoyarsk citizens.

Our city is open for interaction and fruitful cooperation.

Edkham Akbulatov
Mayor of Krasnoyarsk
